

EXCELLENCE PROGRAM

Bachelor with Honors

A challenging
study program
tailor-made for
your talents.

»Excellence does not arise out of nothing—it requires early promotion and challenges, and with our excellence program Bachelor with Honors we provide both to talented students.«

— Ulrich Schmid, Program Coordinator

Challenge Your Talents

Designed as a one-year extension of our regular Bachelor's degree programs and comparable to the Anglo-American model, this excellence program is an additional offer to undergraduates in all our Bachelor's programs. As an honors student, you will receive opportunities that challenge your talents and bring out your full potential. You will also broaden and deepen your professional knowledge and personal skills. Individual mentoring, paired with an interdisciplinary, flexible approach, and transparent, exclusively performance-based rules are the cornerstones of the program.

Your Excellence. Certified.

As a successful graduate you receive a certificate signed by the Rector, the Vice Rector for Academic Affairs, the Dean and the Dean of Academic Affairs, which acknowledges the completion of the Bachelor with Honors program. Moreover, in a personal letter of recommendation the Rector highlights your distinguished achievements and, for having met all requirements for graduation, accepts you into the Top 5% of students at TU Wien.

Tailor-Made for Your Talents

Together with your mentor you compose your Bachelor with Honors program according to your personal interests and talents. It can be composed of a wide variety of topics and courses, including research-related mandatory Bachelor-level courses in any discipline offered by universities, Informatics-related university Master-level courses, and courses and internships specifically offered to Bachelor with Honors students.

How We Promote You

- personal mentoring
- Internships at international top universities and companies
- specific scholarship programs
- Networking opportunities
- close involvement with research and faculty
- excellent career prospects

Internship Partners

»The Bachelor with Honors program is a great initiative, and the internship program is especially laudable.«

— The Members of our IAB

Universities: ENS Paris-Saclay (FR), Purdue University (USA), University of Illinois (USA)

Industry: Infineon (AT), Intel Research (DE), Robert Bosch AG (AT)

Research Institutions: IST (AT), Max Planck-Institut für Informatik (DE)

Admission and Info

Admission and graduation depend solely on performance. The most important criteria for successful admission are a suitable mentor, a coherent honors program proposal (45-60 ECTS), the positive completion of compulsory Bachelor's courses of at least 72 ECTS with a weighted grade point average ≤ 2 .

For detailed information, see informatics.tuwien.ac.at/bachelor-with-honors.

»Austria's universities are competing for the most brilliant researchers. As a research institution that contributes to and shapes national and international research trends, it is our responsibility to promote our young scientists at an early stage, and to open up new opportunities for particularly talented students.«

— Hannes Werthner, Dean
