Curriculum & Contact
↓

The PhD school's curriculum covers the main research areas of the Faculty of Informatics. The PhD programme consists of Fundamental Courses and Area Courses. Students have to take five Fundamental Courses, e.g. Research Methodology, Philosophy of Science, PhD workshop, Research and Career Planning for PhD Students, Scientific Project Management or Innovation Management.
The seven Area Courses are research domain specific, following the faculty's main research areas:

→ **Business Informatics**
→ **Computational Intelligence**
→ **Computer Engineering**
→ **Distributed and Parallel Systems**
→ **Media Informatics and Visual Computing**
